

Frequently Asked Questions

Solar 4 bulb Home Lighting & Phone charging system

How do I charge the Power Storage System?	Keep the solar panel at a fixed location in direct sunlight and connect the given cable to the Power Storage System. The Power Storage System will start charging and will be indicated in the battery power indicator
Can I charge the Power Storage System with wall socket?	Yes, a manufacturer's original power adapter can be separately purchased for wall socket charging, as charging with aftermarket adapters may damage the Power Storage System
How do I know if the Solar Home System is charging?	While charging with solar panel, the white LED indicator on the power storage system turns red. The charging indicator will turn green when nearly full charged
Can I keep the Power Storage System and solar panel outside to charge when it is raining?	It is not recommended to keep the Power Storage System exposed to rain as the Power Storage System is not waterproof. The solar panels are waterproof and can be kept outdoors for charging in all seasons
Will the battery charge if the day is cloudy?	Yes, the Power Storage System will charge if the day is cloudy but may take more time than usual to get it fully charged
Do I have to keep the solar panel out all day and night?	Keep the solar panel in direct sunlight during daytime for charging. Post evening, the solar panels may be shifted indoors as well. The solar panels are waterproof and can be kept outside all day long even during the monsoon season.
How much time is required to get the Power Storage System fully charged?	The Power Storage System requires about 8 hours of direct sunlight to get fully charged
How long would the light last after a fully charge?	1 LED bulb can last for 36 hours 2 LED bulbs can last for 18 hours each 3 LED bulbs can last for 12 hours each 4 x LED bulb can last for 9 hours each
Can I charge my phone with the Power Storage System?	Yes, connect the Solar Home System with your phone using manufacturer provided original 5-in-1 USB charging cable.
How do I switch on the Light bulb?	Switch on the main power button of the Power Storage System. The green LED working indicator will light up, thereafter use light switch on wire to switch on each light
How many lightbulbs can I use at the same time?	You could use 4 bulbs at the same time. However, 4 bulbs at the same time will reduce the working time of each bulb
Is the Power Storage System splash resistant?	It is advisable to use the Power Storage System indoors and prevent exposure to water as the System is not splash resistant. However, the solar panel is water proof and can be kept outside or preferably on rooftops all day even during the monsoon
How do I get the best out of the equipment?	You may adopt the following good practices: <ul style="list-style-type: none">• Fully charge the Power Storage System before first use

	<ul style="list-style-type: none">• Charge the battery after every complete discharge.• Do not leave the battery in fully discharged state.• The Power Storage System should always be placed in a dry and shaded place• Always keep the solar panel clean and in good condition• Keep the Power Storage System charging for an additional 2 hours after indicator light turns to green to ensure the battery is fully charged• Avoid Throwing or dropping the products to prevent any damage• Keep Power Storage System away from any fire or any corrosives
